Machine Works Inc.

# PRESSURE PIPING

## CERTIFICATION TO ASME SECTION VIII-DIV. 1 PRESSURE VESSELS

Gemini Machine Works provides shop fabricated pressure components with quality, schedule and affordability the primary focus of every project we take on. Our pressure piping framework allows for detailed control of every aspect of your project, with complete transparency.

### CAPABILITIES

Our capabilities include the precision repair or manufacture of pressure components up to 12 meters (40') in length with diameters of 1.5 meters (60"). Pressure piping shop throughput of 1,600 WDIF per week or 6,400 per month.

### EXPERIENCE

With over 40 years of combined industrial experience Gemini's management team are the experts in project management, client requirements, material grades, types and thicknesses. We provide solutions that save on-site hours and interruption.

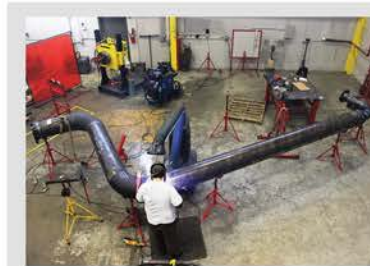

### INDUSTRY CERTIFICATIONS

### Process Piping - B31.3

ASME's most commonly used code of construction for Alberta's above ground pressure piping projects. Gemini can provide fabrication pricing for any kind of project that requires B31.3 either lump sum, unit rate or reimbursable.

### Power Piping & Boiler External Piping - B31.1

Gemini is proficient in the construction, repair and alteration of power generation piping systems and components using high heat and pressure.

### Fittings Category - A, B, H

Gemini understands the manufacturing and modification of registered fittings can be critical in certain applications to increase the effectiveness of piping systems as well as longevity of system components. Our welder fabricators can construct, repair or alter piping system components at our facilities or in the field.

# Quality Manufacturing Meeting the Needs of Industry

Pressure piping systems are a critical part of industry and utilizing Gemini as your provider gives you transparency from pricing to delivery. Our team understands that the quality of the product is just as critical as the schedule. We provide the communication and reporting you require to successfully construct and maintain your facilities.

## Relationship Based Business Model

We fabricate the pressure containing components you require, when you require them. Gemini maintains an open-door policy, and inspectors are welcomed to review the quality of our workmanship throughout the project.

## From Quotation to Completion

Each piping project has unique and dynamic challenges demanding attentive service and advanced technical expertise. Every pressure piping project undertaken by Gemini is thoroughly planned, scheduled and executed by our team of industry professionals and tradespersons qualified and experienced in pressure piping systems.

## Always ON<sup>™</sup> TRANSPARENT WORK-IN-PROGRESS TRACKING

Gemini customers benefit from our innovative work-in-progress job tracking platform. Get real time progress updates, request change orders and job acceleration online. Visit [GeminiMachine.com](http://GeminiMachine.com) to register.
